

# Which Entrance Do I Use?

1. The West Entrance is still the main entrance for visitors, vendors and routine business.
2. The East Entrance is the main entrance for all inpatients and outpatients coming to the hospital for services of any kind (tests, treatments, surgery, etc.) and where patient registration is located. The Emergency Department entrance is also located on this side of the hospital.
3. The Clinic Entrance is the way to access five different physician clinics, all located on the second floor: Aberdeen Surgical Associates, Avera Medical Group Cardiovascular Specialists, Avera Medical Group OB/GYN, Avera Medical Group Nephrology and Avera Medical Group Neurosurgery.
