

# GIVE IT A SHOT.

Stay up-to-date on immunizations

## WHY IMMUNIZE?

Protect your family: Vaccines give you the power to protect yourself and your family from getting sick.

They protect against serious illnesses such as measles, mumps, tetanus, chicken pox, meningitis and more.

Protect our society: Diseases like polio, diphtheria and rubella are becoming rare due to vaccinations. Until we eliminate disease, it's important to keep immunizing.

Vaccinations are safe: The CDC and FDA take many steps to make sure vaccines are very safe. The CDC also reports that there is absolutely no link between vaccines and autism.

Schedule immunizations today. Learn more at [Avera.org/shots](http://Avera.org/shots)

## IMMUNIZATION RECORD

Birth _/_/___	<input type="checkbox"/> Hepatitis B (HepB)
2 mo _/_/___ _/_/___ _/_/___ _/_/___ _/_/___	<input type="checkbox"/> Rotavirus (RV) <input type="checkbox"/> Diphtheria, tetanus and pertussis (DTaP) <input type="checkbox"/> Haemophilus influenzae type b (Hib) <input type="checkbox"/> Pneumococcal (PCV) <input type="checkbox"/> Polio (IPV) <input type="checkbox"/> Hepatitis B (HepB)
