

Let's Keep it Clean

Cleaning

Removes dirt and germs from surfaces and objects using soap and water.

Disinfecting

Kills germs on surfaces and objects using chemicals. Does not necessarily clean or remove germs.

Sanitizing

Lowers the number of germs on surfaces and objects to a safe level according to health standards. Can be achieved by either cleaning or disinfecting.

**Proper disinfection
can help slow the spread
of many illnesses.**

Wear disposable gloves.

Wash surfaces using soap and water.

Disinfect properly by following directions on the container.

Follow the recommended contact time and keep the surface wet the entire time.

Remove gloves and wash hands immediately.
