

# DOs AND DON'Ts OF WEARING A MASK

- ✓ Wash mask after use in hot water. If not possible, dry it on a hot setting in your dryer.
- ✓ Wash hands for 20 seconds or use hand sanitizer every time you touch your mask.
- ✓ Still practice social distancing when wearing a mask.
- ✓ Make sure it fits snugly but comfortably against the side of your face.
- ✓ Make sure it covers your mouth and nose.

**Max, lead pup expert, shows the PERFECT way to wear a mask.**

- ✗ Touch or adjust your mask once it's on your face to avoid contamination.

Expert pup Lady says, "Don't wear it around your neck – it won't help then!"

- ✗ Wear your mask more than one day before cleaning.

"No eating masks," says Rex.

- ✗ Touch your eyes, nose or mouth when removing the mask.

"This is definitely not right," says Bailey.

- ✗ Place on young children under age 2.

"Seriously, no sharing a mask," advise Milo and Molly, expert pups in training.
